

## Be Safe

KingstonAudioTours.com provides exciting tours that allow the user to be part of the story and experience, but please remember that you are touring a very active, busy city. Be very weary of vehicles, bicycles and other pedestrians. The tours have been designed such that you may press pause at any time to navigate traffic or spend more time at any given location, and then press play again to continue from where you stopped. Please take advantage of this feature to keep you safe when crossing streets or through busy areas. Also, please do not turn the volume on your audio player up unnecessarily high. Keep the volume at a low enough level to hear environmental noises of cars and pedestrians around you.

KingstonAudioTours.com and its partners and developers do not take responsibility for injury or harm that occurs during the use of our tours. The tours have been designed for your enjoyment – please enjoy responsibly.
